PROJECTS

EcoSort, creator and sole developer

Jun 2026–present

Waste collection dates, offline schedules and reminders · mateuszsliva.dev/ecosort · [App Store](#)

- Took the SwiftUI iPhone app from idea to the App Store in 30 days, with offline schedules, widgets, a Live Activity and reminder actions.
- Built the Android client in Kotlin and Jetpack Compose with Retrofit and WorkManager. It is in closed testing on Google Play.
- Connected both clients to a FastAPI and PostgreSQL backend with FCM and APNs push by address; the React admin panel uses TOTP two-factor login.

TrueSky, creator and sole developer

Sep 2026–present

Weather as an animated painted landscape, available on the App Store · mateuszsliva.dev/truesky · [App Store](#)

- Built the weather scene in React Native and Expo with Skia shaders and Reanimated. Open-Meteo data drives light, wind, precipitation and matching audio.
- Integrated RevenueCat subscriptions and a lifetime purchase, background weather alerts and 32-language localization. The lifetime plan sold in launch week.

Keenwit, puzzle app in development

Aug 2026–present

Wordle-style puzzles with competition against other players and friends · mateuszsliva.dev/keenwit

- Building word, maths and logic games in React Native and Expo, with duels, leaderboards and offline state stored in SQLite.
- Built a Fastify and PostgreSQL backend that validates game sessions and scores and flags suspicious submissions. Tests run in Jest and GitHub Actions.

storeshots and maccsim, open source

Oct 2026

App Store screenshot automation and remote iOS

development · github.com/MSliwa01/storeshots · github.com/MSliwa01/maccsim

- storeshots composes, checks and uploads real app captures to App Store Connect; maccsim builds and runs iOS apps on a Mac from Linux over SSH.

OPEN SOURCE

Accepted fixes: React Native Skia: shared one WebGL context between offscreen surfaces on the web; released in 3.4.3 (#4221) · React Navigation: dismissed the keyboard when opening the drawer programmatically (#13287)

SKILLS

iOS: Swift, SwiftUI, WidgetKit, Live Activities, notification extensions, XCTest

Android: Kotlin, Jetpack Compose, Retrofit, WorkManager, Firebase Cloud Messaging

Cross-platform: React Native, Expo, TypeScript, JavaScript, Skia, Reanimated

Backend and services: FastAPI, PostgreSQL, Fastify, REST APIs, OpenAPI, APNs, RevenueCat

Testing and delivery: Jest, pytest, Playwright, GitHub Actions, Git, Docker, Bash, SSH

EDUCATION

MSc in data engineering, University of Zielona Góra, 2025–2026

Specialisation in data mining systems

BA in economics, University of Zielona Góra, 2021–2024

LANGUAGES

Polish, native · English, C1 with the Cambridge C1 Advanced certificate from 2025 · German, A2
